INVITATION

We would like to invite you to our industry day where leading scientists, practitioners, and industry will have the chance to meet, discuss and get to know the innovations for fighting antimicrobial resistance in livestock farming.

If you'd like to attend, please register [HERE](#)

During the event, you will have the opportunity to present the innovation/product of your research/company.

If you are interested, please download the abstract template [HERE](#). Please fill it in and upload it to the registration page.

Date: June 23rd 2022

Time: 9:30-16:30 h (CEST, GMT+1)

Location: [Aemilia Hotel, Via G Zaccherini Alvisi 16, 40138 Bologna, Italy.](#)

DRAFT PROGRAMME

Thursday 23 June 2022, Bologna, Italy

9:30-16:30 CEST

The programme will include short presentations on innovations and products from the project and from Industry about biosecurity, resilience, early detection, and precise and alternative medication.

In the afternoon different thematic sessions* will take place to exchange ideas and solutions on:

- Legislation & surveillance: a threat or opportunity?
- Alternatives for antibiotics: do they exist and – if so – which are most promising?
- Prevention of disease: stockmanship or technical solution?
- Early detection & precision medication: which novel techniques are feasible and robust in practice?

The meeting will be concluded with a networking reception & poster presentations

*Please indicate the session of your choice upon registration
